PHILOSOPHICAL MAGAZINE B, 1999, VOL. 79, NOS. 11/12, 2167–2172

SUBJECT INDEX

Vol. 79

PAGE

α-Fe_2O_3 oxygen K-edge spectrum 25
A Luttinger theory revisited 1097
a-SiC:H films by plasma enhanced CVD: deuterated 1685
a-Si:H compared to its polymorphous form 1079
a-Si:H hydrogen dilution effects during growth 387
a-Si:H thermally enhanced quantum efficiency 291
a-Si:H(Er) prepared by dc sputtering 1205
Ag thermodynamic properties and lattice dynamics 911
$Ag/As_{33}S_{67}$ bilayer reaction 223
Al–Cu alloys, electronic structure 205
Al–Cu–Fe oxidation 91
Al–Ni–Co quasicrystals from the melt 425, 1673
Al–Pd–Mn heterophase interface 157
AgI-based phosphate glasses at low temperatures 2073
Amorphous SiN_x 137
Anderson-like amorphous vibrational spectrum 1755
Anderson localization in actinides 683
Anomalous electrical behaviour of glycine at 31°C 1695
Antiferromagnetic Fermi liquids 15
Atom ejection by THz phonon excitation 149
Atomic-scale conductors: spatial current distribution 1577
Au/PZT/YBCO ferroelectric capacitors 829

β-relaxation origin in polyurethane by neutrons 1881
Bandgap closure in mercury clusters 1427
Bandgap in As-based chalcogenide films 249
Bandgap in nanoscale Si with hydrogenation 777
Bässler's disorder formalism used in polysilanes 1631
Bi-2212 thin film voltage jumps 1703
Bi-2223/Ag pancake coils 281
$(Bi_3Pb)Sr_3Ca_3Cu_{4-n}Ti_nO_x$ precursors for Bi-2212 1161
Bond-valence approach to cuprate doping 343
Boston peak in vitreous silica 2057
Breakdown of Debye–Stokes–Einstein in glassy liquids 1783
Brillouin scattering in molecular liquid *vs.* salt mixture 1857

Carbon, interstitial in copper 1615
Carbon, nanoporous 1499, 1519
Carbon, nanotubes 1531
Chalcogenide glass chemical ordering 373
Charge carrier dynamics in high-T_c superconductors 1703
Colossal magnetoresistance isotope effect 119
Confined Ga phase transitions and undercooling 2113
Confined liquid polymers in porous media 1871
Connectedness in covalent solid network 373
Cr ultrasound velocities in all of its phases 663
Critical behaviour in fracture of disordered media 1939

Cu–C interface in Cu 1615
Cu on Pt(100) 269
$CuIr_2S_4$ and $CuIr_2Se_4$ thermopower and conductivity 1021
Cu precipitates in C films 501

Deformed semiconductor: Hall coefficient and resistivity 541
dHvA of both sides of a superconducting transition 1045
Diamond films on transition metals 593
Diamond nucleation in amorphous carbon 367
Dianionic gold clusters 1343
Dielectric spectroscopy for supercooled systems 1953
Diffusion and relaxation in liquid and amorphous metals 1907
Diffusions, locons, propagons in a-Si 1715
Disordered CuAu alloys 869
Dispersive transport transitions in solids 881
Dopant sites in high-T_c layered cuprates 1477
Doped ^{4}He clusters 1437
Drift diffusion in strong electric fields 1659
Dynamic structure factor in glasses 2037
Dynamical correlations in supercooled liquids 1827

EELS in HRTEM to study plasmon losses 1531
Efros–Shklovskii to Mott variable range hopping 1591
Elastic and thermal calculations of carbides and nitrides 839
Electric force microscopy and SEM correlation 517
Electromigration model for void growth 257
Electron capture by metal clusters 1401
Electron cyclotron resonance plasma deposition 137
Electron states of $Y_3Al_5O_{12}$ (YAG) 921
Electronic shell structure in clusters 1321, 1379
Eliashberg calculation for copper oxides 15
Emission processes of clusters 1413
Enthalpy relaxation in glassy metals and polymers 565
Entropy of alloy and intermetallic compound formation 753
Er-activated SiO_2–TiO_2 waveguides 2103
$ErFe_2$–H_2 or D_2 interstitial-site occupancy 1185
$ErFe_2$–H_2 non-collinear magnetic ordering 1195

Failure by void growth in electromigration 257
Fe–40 at.% Al magnetic transition 449
Fe_2P-type superconductors 767
Fermi-liquid renormalization in heavy fermions 111
Ferromagnetism and antiphase boundaries 449
Filamentary model for super- and semi-conductors 527, 1477
Foam cell elongation and side swapping 729
Fragmentation of metal clusters 1401
Frenkel crossover to Poole effects 331

Glassiness of water in confined states 1923
Grain growth evolution simulation 703

H_2-loaded and heated germanosilicate optical fibres 2137
Hard ellipsoid theory for molecular liquids 1815
Hard-sphere binary quasicrystal stability 1603
Hartree–Fock interpretation of K-edge spectrum 25
Heat capacity of clusters as a function of their size 1367
Heat islands in cities 1457
Heavy fermion to localized crossover 683

Hexacyanometallate-based ferromagnet 127
HfRuP superconductivity 767
High frequency dynamics in plastic crystals 1945
High-T_c superconducting coil 281
High-T_c superconductors - ideal phase diagram? 527
High-T_c suppression in YBCO by Pr 717
High resolution UV of disordered materials 1741
Hole distribution in cuprates 343
Hole drift in aryl-substituted polysilanes 1631
Hopping dynamics in random energy landscape 1915
Hydrogen in rare-earth-iron compounds 593
Hydrogenated tetrahedral a-C films: structure 1647

Increased refraction, decreased gap in a-Si:H(Er) 1205
InSb E_1 edge magnetoreflectance 537
Ioffe–Regel limit in disordered materials 1747
Ion-induced polymer modification 793

Jahn–Teller isotope effect calculation 119

Knight shift 1231, 1247, 1253
Kubo effects in particles 1263

$La_{1-x}MnO_{3-b}$ thin film TEM 897
$La_{1-x}Sr_xCoO_3$ magnetic ordering 969
$La_{2-x}Sr_xCu_{1-y}Ni_yO_4$ structure and thermopower 1145
Langmuir–Blodgett films with Yb bis-phthalocyanine 1005
LDA for ceramic nanoclusters 407
Lead vanadate glass relaxation of electrical properties 1175
Liquid CVD of $La_{1-x}MnO_{3-b}$ on $SrTiO_3$ 909
Liquid foam evolution 729, 1213
Lithium fulleride dynamics and diffusion 2065
Local structure of nanoporous carbon 1519
Localization in two-dimensional quantum percolation 491
Long-time dynamics in a simple glass 1987
Low-frequency dynamics of silica xerogel 2091
Low-frequency light scattering in silica xerogels 2081
Low-frequency Raman in glasses 2057
Luminescence in indirect bandgaps 177
Luttinger and Landau Fermi liquid 1097

Magnetic-field induced crossover in Si:(P,B) conduction 1591
Magnetic states in Tb metaphosphate glass 2121
Magnetic susceptibility on HF superconductors 111
Magneto-optical differential reflectance 537
Matrix-isolation spectroscopy 1307
Melt-spun Hf–Ni alloys 163
Mesoscopic regime of disordered materials 1741
Metal–insulator transition in 2d electron gas. 859
Metallic adsorption *ab-initio* calculation 269
Metallic quantum dots 1267
Metastable solid metallic hydrogen 655
Metastable state transitions in silica clusters 1971
Mixed dynamic form factor in EELS 941
Molecular dynamics of Fe/Ag and Cu/Pd multilayers 625
Molecular dynamics of precision grinding 955
Molecular dynamics of solidifying quasicrystals 1603
Molecular magnet 127

Molecular orientation in lipid bilayers 381
Momentum of sound waves 1445
Multiple trapping model 49
Muonium centres in crystalline silicon 1561

Nagel–Tauc glass stability criterion 239
Nanocrystal microstructure 163
Nanocrystalline diamond EELS 477
Nanodomains in high-T_c layered cuprates 1477
Nanoporous carbon simulation 1499
Nanoscale domains in synthetic membranes 1549
Near-edge loss by STEM 921
Ni_3Al and Cu_3Au thermodynamic properties 981
Nickel carbonyl clusters 1353
$[Ni(pn)_2]_3{\cdot}[Fe(CN)_6]_2{\cdot}12H_2O$ EPR 127
NMR in small metal particles 1263
Non-crossing approximation half-filled Hubbard model 817
Nonlinear Frenkel effect 331
Novel dynamics of silica and metallic glasses 1733

One-dimensional hopping in liquid-crystal glass 463
Optical and electrical properties of a porphyrin 993
Optical anisotropy of phospholipid bilayers 381
Optical studies of composite organic films 1005
Optically induced conductivity of water and oil 2005
Order in molten trivalent metal halides and oxides 1833
Oxygen-related anisotropic muonium in Si 1561

Pair distribution functions by neutrons 1519
Parabolic quantum dot in a magnetic field 77
$Pb(Mg_{1/3}Nb_{2/3})O_3$ dielectric permittivity 435
$Pb_{0.95}Sn_{0.05}Se$ single crystal deformation 541
$PbZr_xTi_{1-x}O_3$ capacitors under irradiation 829
Pd–Ni–P metallic glasses 239
Phase-transition mechanism in fluoride perovskites 319
Phonon scattering in HRTEM 37
Photoconductivity transients 881
Photoinduced solid-state chemical reactions 223
Photoinduced structural change 249
Photophysics of transition-metal clusters 1379
Pick-up cross sections for He clusters 1437
Plasma-assisted diamond deposition on metals 593
Plasmon excitations in carbon nanotubes 1531
Plasmon response of diamond 477
Plasmons at shock fronts 643
Plasmons for modification of polymers 793
PLPC liposome nanodomains 1549
Polarization interactions in metal clusters 1401
Polymorphous Si films 1079
Porphyrin monomer and its J-aggregate 993
Potts frustrated model and glasses 1807
Pr in $YBa_2Cu_3O_7$ single crystal studies 717
$PrBa_2Cu_{3-x}Ga_xO_{7-y}$ resistivity model 63
Prediction of properties of ceramic nano-clusters 407
Propagating acoustic modes by Raman in glasses 2051
Properties of liquids confined in MCM-41 1847
Pseudogap in Hume–Rothery type alloys 205
Pyroelectricity in single-crystal glycine 1695

Quantum dots through a metal-insulator transition 1299
Quasicrystal diffuse scattering and resistivity 425
Quasicrystal magnetic susceptibility and resistivity 1673
Quasicrystal heterophase interfaces 157
Quasicrystal *vs.* crystal oxidation 91
Quasiharmonic silver under pressure 911
Quasiparticle diffusion in high-T_c superconductors 1703

Rare earth impurities in semiconductors CEF 177
$Rb_{0.68}K_{0.32}CaF_3$ structural stability 319
Reactions of size-selected metal cluster ions 1353
RE_2Fe_{17} magnetic relaxation with H_2 585
Reflective surfaces for cooler buildings and cities 1457
Relaxation in *o*-terphenyl by ESR 1993
Replica method for glasses 1775
Retarded Green's function for quantum dot 77
Reticulated amorphous polymers, elastic and C_P 1889
RuO_2 resistor microstructure correlations 517

Scattering or lifetime dominance in acoustic modes? 1763
Search for Peierls invariant in Fermi–Pasta–Ulam chain 1821
Second harmonic generation from quantum dots 1299
Sharing of Brillouin and Umklapp scattering in glasses 2021
Short-range order model for Cu_xAu_{1-x} 869
Silicon p–i–n photodiode efficiency 291
Single impurity model by photoemission 1
Size-selected clusters 1307, 1343, 1353
Small phase-coherent conductors 1577
Sodium clusters by mass abundance spectrometry 1321
Solute–solvent depends on monomer end groups 1877
Sound waves in anharmonic media 1445
Spin liquids 859
Spinel thermal conductivity and thermoelectric power 1021
Stern–Gerlach deflection of ferromagnetic clusters 1367
Strong coupling limit in half-filled Hubbard model 817
Structure and dynamics of sodium disilicate 1981
Structural relaxation equations 1799
Structural relaxation seen by DSC 565
Structural stability modelling of irradiation 2129
Substitution effects on relaxor properties 435
Superconducting mixed state dHvA measurements 1045
Superconducting size effect 1267
Superlattice deposition modelling 625
Supercooled systems: relaxation dynamics 1953
Surface Evolver software use 1213
Surface plasmons in nanoclusters 1281
Surfactants and cosurfactant by molecular dynamics 9

ta-C:H films by cathodic vacuum arcs 1647
Tetrahedral crystal fields 177
Thermal diffuse scattering in TEM 37
Thermally nanocrystallized Si layers 777
Thermodynamic properties from tight-binding potential 981
Thiophene-based oligomers, supersonic seeded beams 2157
Ti doping of Bi-2212-type superconductors: transport 1161
TiC, TiN, VC and VN thermal expansion 839
Time-resolved Kerr effect in meta-toluidine 1897
Transient photoconductivity 49

Transport in liquid-crystal triphenylenes 463
Transport invariants and Umklapp processes 1839
Two-dimensional quantum percolation 491
Two-level systems in argon clusters: energy landscape 1965
Two-site protocol polaron model transfer dynamics 1931

UBe_{13} heat capacity in a magnetic field 111
URu_2Si_2 de Haas–van Alphen oscillations 1045
Ultradispersed Cu in C 367, 501
Ultrasound at high pressure 663

Vapour pressures for monomers and dimer emission 1413
Variable range hopping from small polarons 63
Vertex dynamics of grain growth 703
Vibrational entropy in alloying and compounds 753

Walter David Knight: an appreciation 1225
Walter David Knight: publications 1239
Water–oil–surfactant interface model 9
Wigner glass 859

XPS of Pr in zinc borate glasses 2145
X-ray dynamic structure factor of liquid Li 2027
XPS on metallic glasses 239

$YBa_2Cu_3O_x$–Au sintered-composite resistivity 1029
$YbInCu_4$ photoemission 1

ZrRuP, ZrRuAs, ZrRuSi and ZrRuGe superconductivity 767

PHILOSOPHICAL MAGAZINE B, 1999, VOL. 79, NOS. 11/12, 2173–2188
